

TANIA High Level Event

Cooperating for Environmental Remediation

6 October 2021, 10.00 – 12.00 (CET)

Hybrid event: Nanabianca, Florence (Italy) and on-line

For the registration [click here](#)

TANIA seeks means to **treat contamination through Nanoremediation**.

Environmental remediation is gaining importance across Europe, as part of the European Green Deal. Becoming the world's first climate-neutral continent by 2050 is the greatest challenge and opportunity of our time. TANIA partners have taken on this challenge, supporting public policy that merges innovation with environmental sustainability.

Our final event marks a milestone in TANIA course, and represents an opportunity for sharing the results achieved, before moving on to the next programming period.
